Sajim Hasan

Results-driven Software Developer with hands-on experience in building scalable web and mobile applications. Skilled in Java, Spring Boot, Flutter, and Dart, with strong expertise in database management using MongoDB and PostgreSQL. Proficient in implementing authentication systems and developing real-time communication features with WebSocket. Adept at collaborating in cross-functional teams and delivering clean, efficient, and maintainable code. Passionate about solving complex problems and continuously learning new technologies to drive innovation.

Work Experience

Job Projects

- Language Learning Application: Developed a fully functional app focused on language translation and learning, where I worked as a front-end developer.

Personal Projects

- E-commerce Application – Built a complete solution with Spring Boot (backend), Flutter (frontend), and PostgreSQL (database).
- Movie API (Netflix Clone) – Created a streaming-style app using Flutter, Spring Boot, and MongoDB Atlas.
- QR Code Scanner – Designed and implemented a mobile QR code scanner using Flutter.
- To-Do List Application – Built a task management app with a local database for personal productivity.
- Habit Tracker – Developed an app to help users track habits and plan their next 24 hours.
- Messaging Application – Built a real-time chat app using Flutter and Firebase.

Real World Problem Solving Projects

- News Application (Feb 2020 – Jan 2021) – Developed a "dopamine-free" news app aimed at helping users reduce screen time and consume content more mindfully.
- E-commerce Platform for Small Sellers – Created a cost-effective e-commerce solution tailored for small businesses to sell imported products without requiring heavy investment.
- Habit Tracker (Enhanced Version) – Improved functionality to support daily habit analysis and progress tracking.

Skills

Technical Skills
- Spring boot
- Flutter
- MongoDB
- Postgres
- React JS

Tools
- Docker
- Websoket
- Postgresql Shell
- MongoDB Shell
- Firebase

Languages
- Java
- Dart
- sql
- Json Native

Certification
- Java - Udemy.com
- Spring boot - Coursera.org
- Flutter - Learn with noman
- MongoDB and postgresql - Telisku.com
- Cloud - Telisku.com

Cloud
- MongoDB-Atlas
- AWS
- FireBase-cloud
- Google-Cloud

Job Experience

Flutter Developer
"Good Deal" Marketing Agency — 3 Months

- Developed and maintained mobile applications using the Flutter framework.
- Collaborated with design and backend teams for smooth integration.
- Optimized app performance and resolved bugs.

Full Stack Developer & Content Writer
Startup Initiative — 6 Months

- Worked as a Full Stack Developer, managing both frontend and backend development.
- Simultaneously contributed as a Content Writer, creating engaging and informative content.
- Collaborated with teams to ensure cohesive product development and content strategy.
- Played a key role in both technical and creative aspects of the startup project.
